Vitamin D3 (cholecalciferol) 400 IU [10 mcg]	200%
Lactobacillus Rhamnosus GG 1×10^9 CFU	-

* Daily Value not established

Other Ingredients: Corn oil.

NutraBiotic Plus D Drops contains Lactobacillus rhamnosus GG is one of the most well-studied probiotics a "friendly bacteria", combined with Vitamin D, an important nutrient for babies to help them build strong bones.

Lactobacillus rhamnosus GG provide good bacteria to help foster the proper gastrointestinal balance that helps develop a healthy digestive system for better nutrient absorption, help ease colic, excessive crying, spitting up & fussiness for babies, help promote the development of a healthy immune system and supplement the good bacteria found in breast milk.

Vitamin D3 (cholecalciferol) is a fat-soluble vitamin that helps your body absorb calcium and phosphorus. Having the right amount of vitamin D, calcium and phosphorus are important for building and keeping strong bones and teeth.

Vitamin D3 also helps in regulating the immune system and cell growth. Breast milk usually has low levels of vitamin D, so Vitamin D drops are given to breastfed infants.

INDICATIONS:

For Healthy Bone Development
For Promote Digestive and Immune System Health
